Oghenekevwe Jade Etaduovie

Frontend Developer Intern | UI/UX Design Intern | Full-Stack Product Builder

jadeetad@jadeetad.com | 08028739017 | GitHub: jadeetad | LinkedIn: linkedin.com/in/jade-etaduovie-95445231b

Profile Summary

A focused and forward-thinking frontend and full-stack developer with a passion for building intuitive, people-centered digital experiences. Combines UI/UX design principles with clean, responsive frontend development and modern full-stack architecture to create functional, scalable web solutions. Actively advancing skills in React and Next.js while expanding technical breadth through the Ultimate AWS Certified AI Practitioner course to build scalable, future-ready products.

Core Skills

Frontend Development: HTML, CSS, JavaScript, React, Next.js, Responsive & Mobile-First Design, Modern UI Layouts

Full-Stack & Backend: Next.js (App Router), Drizzle ORM, Better Auth, API Route Design, Third-Party API Integration (Claude API, Gemini API)

Data & Infrastructure: Upstash Redis, Database Schema Design, Environment Configuration

Mobile: Flutter, Dart

UI/UX & Product Design: Figma, Wireframing, User-Centered Design, Design Consistency

Research & Documentation: Design Research, Content Structuring, Technical Documentation

Collaboration & Communication: Team Collaboration, Clear Communication, User-Focused Problem Solving

Financial & Analytical: Credit Analysis, Research Skills, Critical Thinking, Presentation Skills, Quantitative Analysis (Finance), Hazard Identification

Version Control: Git, GitHub

Selected Projects

KANSŌ (感想) — AI-Powered Reflective Writing Companion

Designed and built a full-stack reflective writing app that returns literary observations on user entries rather than advice, with a custom writing interface and distinct visual identity.

Tools: Next.js, Drizzle ORM, Better Auth, Upstash Redis, Claude API / Gemini API

SpendWise — AI-Powered Finance Tracker

Conceptualized and built a smart financial management platform with AI-powered spending habit analysis, peak period identification, and splurge tracking.

Tools: React, AI Integration, Responsive Design

Laptop Harbor — E-Commerce Platform for Laptops

Built an e-commerce website for laptops of all types, covering product browsing and a full purchase flow.

Tools: Flutter

EventSphere — UI/UX Design Collaboration

Collaborated on a modern event discovery platform; contributed to research, wireframes, layouts, and user flows.

Tools: Figma, HTML, CSS, JavaScript

Also contributed to the restoration of the ActaPress platform and completed several school-based projects that strengthened practical problem-solving skills. Has tutored classes and assisted students by explaining concepts clearly, developing strong communication, patience, and leadership abilities.

Education & Certifications

APTECH Computer Education

Advanced Diploma in Software Engineering (ADSE — Java, AI/ML) | Sept 2024 – Sept 2026

California Institute of the Arts (Coursera)

UX Design Fundamentals

California Institute of the Arts (Coursera)
Visual Elements of User Interface Design — Verify: coursera.org/verify/45R5N4F2ZUWM

Currently Advancing
React (component-based architecture, reusable UI), Ultimate AWS Certified AI Practitioner

Standard Chartered Bank — Credit Analyst Job Simulation (Forage)
Skills: Credit Analysis, Research Skills, Critical Thinking, Presentation Skills, Quantitative Analysis (Finance), Hazard Identification

Beyond Code / Interests

- Exploring creative intersections through reading, visual storytelling on Instagram and Pinterest, crocheting, baking, and cooking.
- Constantly brainstorming innovative ideas, driven by curiosity and problem-solving.
- Finding innovative ways to bring together AI and the arts.
- Thrive in productive, stimulating environments that challenge me mentally and physically, fostering growth, creativity, and meaningful impact.
